### $\Delta(1920)$ FOOTNOTES

- <sup>1</sup> CHEW 80 reports two  $P_{33}$  resonances in this mass region. Problems with this analysis are discussed in section 2.1.11 of HOEHLER 83.
- <sup>2</sup> See HOEHLER 93 for a detailed discussion of the evidence for and the pole parameters of  $N$  and  $\Delta$  resonances as determined from Argand diagrams of  $\pi N$  elastic partial-wave amplitudes and from plots of the speeds with which the amplitudes traverse the diagrams.
- <sup>3</sup> The range given for DEANS 75 is from the four best solutions.
- <sup>4</sup> A Breit-Wigner fit to the HERNDON 75 IPWA; the phase is near  $-90^\circ$ .
- <sup>5</sup> A Breit-Wigner fit to the NOVOSELLER 78B IPWA; the phase is near  $-90^\circ$ .
